

Veethree

Electronics and Marine LLC

Dear Customer,

RoHS COMPLIANCE STATEMENT

Veethree Electronics and Marine LLC (also known as Veethree Instruments) has reviewed the RoHS (Restriction of Hazardous Substances) requirement and noted that based on information from <http://ec.europa.eu> listing RoHS requirements, exemptions and exclusions that our products are used on items that fall under the "Permanent Exclusions" section. This exclusion is for "means of transport for persons or goods, non-road mobile machinery".

The full notation as listed on <http://export.gov/> is noted in the following:

Permanent exclusions from RoHS include the following: military equipment, space equipment, **equipment designed to be part of another piece of equipment falling outside the scope of RoHS**, large scale industry tools, Large scale fixed installations, **means of transport for persons or goods, non-mobile road machinery**, active implantable medical devices, photovoltaic panels, equipment for research and development only available business to business.

Based on this exclusion we note that our products are designed to be used on means of transport for persons or goods, such as, but not limited to boats, cars, trucks, trains, planes, PWC's, ATV's, buses, tractors, construction vehicles, etc. or on non-road mobile equipment such as generators, air compressors, etc.

Other items that fall outside these parameters may require special RoHS instrumentation, but it is our understanding that as noted above the general Veethree Instrumentation and Displays meet the exclusions as highlighted in bold lettering above.

We are committed to ensuring product compliance with REACH. Should you have any questions regarding the content of this letter, please do not hesitate to contact Veethree Electronics.

Sincerely,

Rick McAnally
Advanced Manufacturing Manager
